

## 2009-10 Adequate Yearly Progress List

The federal government approved the state's differentiated accountability model, which is named Smart Accountability, in January 2009. The model divides schools into the following categories:

- Achieving, meaning the school has made adequate yearly progress for two or more years.
- Alert, meaning the school did not meet adequate yearly progress this year after meeting it last year and therefore is not in a phase of school improvement
- Targeted School Improvement, meaning a school has been identified as being in school improvement status because one or more, but fewer than 25 percent, of its student subgroups failed to meet adequate yearly progress for two or more consecutive years
- Targeted Intensive Improvement, meaning that a school has remained in Targeted School Improvement status for four or more years.
- Whole School Improvement, meaning that a school has been identified as being in school improvement status because the full test-taking population and/or more than 25 percent of its student subgroups failed to meet adequate yearly progress for two or more consecutive years.
- Whole School Intensive Improvement, meaning a school has remained in Whole School Improvement status for four or more years.
- State Directed, meaning that a school has remained in school improvement status for five or more years. At this level, the state requires schools and districts to implement more interventions and to work with a school improvement team or director that is appointed by or approved by the state.
