Dear Counsel:

This evening, the Government learned that there are additional covert recordings made by Micah Neal that were never obtained by the Government. Counsel for Defendant Shelton had inquired, [REDACTED] whether there were additional recordings. This prompted the Government's inquiry which resulted in the Government learning this evening that there are 79 additional recordings made by Neal that were not obtained by the Government, and thus were not provided in discovery. The recordings are in the possession of Neal's counsel, Shane Wilkinson.

The Government does not have these recordings in its possession, and does not intend to obtain them unless obtained by defense counsel. Mr. Wilkinson is willing to provide copies of the recordings to the defendants upon request, without the need for a subpoena. Mr. Wilkinson can be reached on his cell phone at [REDACTED]

If you have any questions, please contact me.

Sincerely,

  
Aaron Jennen  
Assistant United States Attorney
