Dear KNWA Staff,

Enclosed is a copy of a letter sent to the President of the United States. The letter has been signed by eighty inmates confined in the same federal prison in which I am held. These individuals are in support of the President's stance regarding border stability and believe a border wall should be a top priority.

These men are volunteering their labor for the betterment of the Country. The proposed action has no negative effects and represents a cost savings to the American taxpayer. Please help these men realize this quest of civil service.

Thank You,

Jon Woods

P.S. I have also volunteered to participate (#72).

RE: VOLUNTEER LABOR FOR THE BORDER WALL

Dear Mr. President,

Attached is a list of individuals who wish to begin construction on a border wall for our President. We are a diverse group of federal prisoners who appreciate the current White House positions and recognize the positive things that they have brought America.

We have come together because we understand the benefit that a border wall will bring the country. Our group hails from all aspects of American society with a common goal of border stability. The Federal Bureau of Prisons already implements mobile work crews of prisoners who perform construction projects in the community throughout the state of Texas. Since we are located in a border state the logistics of this endeavor would be minimal. Mobile housing or FEMA trailers would be adequate living conditions for us at this work site.

Prisoners are a willing and untapped work force. The attached list is just a small sample of inmates who wish to volunteer for our President. Federal border lands are ripe for improvement through the efforts of federal prisoners.

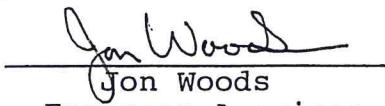

Please send some indication that your office has received this proposal. We would also ask that a form of sentence credit be considered for our work if called into action. Thank You.
