Executive Summary

The Kindergarten Immunization Compliance Assessment (i.e., Kindergarten Assessment) is an annual assessment completed by the Tennessee Department of Health's (TDH) Vaccine-Preventable Diseases and Immunization Program (VPDIP) in collaboration with the Tennessee Department of Education (TDOE) and Tennessee (TN) public and private schools.

The goal of the assessment is to evaluate immunization coverage and exemption levels of state-required vaccines among children entering kindergarten. Children entering kindergarten in TN must be up to date with the following vaccines at the time of enrollment:

- **Diphtheria-Tetanus-Pertussis vaccine (DTaP)**¹
- **Hepatitis A Virus vaccine (HAV)**²
- **Poliomyelitis vaccine (IPV or OPV)**
- **Measles, Mumps, Rubella vaccine (MMR)**
- **Hepatitis B Virus vaccine (HBV)**
- **Varicella (chickenpox) vaccine/credible history of disease**

All required immunizations must be documented on the Tennessee Official Immunization Certificate or a valid military immunization record.³ Immunizing providers are also strongly encouraged to record immunizations in the Tennessee Immunization Information System (TennIIS). The state recognizes five different types of immunization certificates and exemptions:

Complete: All vaccination requirements completed according to the CDC immunization schedule.

Temporary: A temporary immunization certificate is issued when a child has not received all required vaccines but is in the process of completing them. A temporary certificate expires one month after the date that the next required immunization is due, according to the minimum acceptable ("catch-up") dose interval per the CDC/ACIP schedule.⁴ An expired temporary immunization certificate is not valid proof of immunization. Regardless of expiration status, students with a temporary certificate are classified as having an incomplete vaccine record.

Transfer: Child has recently transferred from out-of-state and is in the process of obtaining the Tennessee Official Immunization Certificate.

Religious Exemption: This exemption requires a signed statement by the parent/guardian that vaccination conflicts with their religious tenets or practices. If the child needs documentation of a health examination for the school, the claimed religious exemption must be noted by the healthcare provider on the immunization certificate.

Medical Exemption: Physician (MD, DO) or department Public Health Nurses are authorized to indicate specific vaccines medically exempted (because of risk of harm), preferably on the TDH medical exemption form. Other vaccines remain required. The medical reason for the exemption does not need to be provided.

Children who have incomplete or missing documentation of childhood immunizations are not permitted to attend public school per T.C.A. § 49-6-5001.

Public Chapter 169 Senate Bill No. 386 allows valid military immunization records to be submitted for school entry. Immunization requirements are the same for these military records and students should be reported in the category that represents their immunization status.

¹ Diphtheria-Tetanus toxoid vaccine (DT), if medically indicated

Assessment Process

Tennessee uses a census-based approach to collect immunization data for the Kindergarten Assessment. All public schools with kindergarten students enrolled at the time of the assessment are asked to report assessment results, except for public schools where the students must be tested to determine grade level and programs that are distance learning only. Additionally, all TDOE-accredited private schools in Categories 1, 1-SP, 2, and 3 that have kindergarten students enrolled at the time of the assessment are asked to report assessment results. For a description of private school categories please visit <https://www.tn.gov/education/school-options/non-public-schools/non-public-school-categories.html>. School nurses and/or other trained school personnel review students' immunization certificates and report aggregate, de-identified data to VPDIP for each school year. To validate schools' self-reported results, a sample of public and private schools are randomly selected by the Centers for Disease Control and Prevention (CDC) statisticians and audited every spring. Statewide results are published on the TDH website⁵, shared with TDOE and school districts, and published on the CDC SchoolVaxView website⁶.

2021-2022 School Year Statewide Summary

Statewide, 93.7% of all kindergarten students were fully immunized for all required vaccine series at the time of survey completion. Of the students who were not fully immunized, 1.9% had a temporary immunization certificate on file, 2.3% had a religious exemption on file, 0.1% of students had a medical exemption on file, 1.3% had an incomplete immunization record, and 0.6% were missing an immunization record. When compared to last year these figures represent a 2.0% increase in kindergartners missing required immunizations or proper documentation necessary for school attendance. An under vaccinated kindergarten community is at increased risk for highly infectious and sometimes fatal outbreaks of vaccine preventable diseases.

If a student had a valid temporary certificate, a medical exemption, or an incomplete immunization record, schools were asked to report which individual vaccine series the student had completed. Figure 1 shows the percentage of public and private school students who were complete for each vaccine series compared to the national Healthy People 2020 goals. Note: The percentages in Figure 1 reflect the sum of both public and private school kindergarten students who were complete for an individual vaccine series, regardless of whether they had received all the vaccines required for school enrollment.

⁷ <https://www.cdc.gov/vaccines/imz-managers/coverage/schoolvaxview/data-reports/coverage-trend/index.html>

Figure 1. Percentage of public and private school kindergarten students who were complete for each vaccine series, compared to Healthy People 2020 (HP 2020) goal of 95% complete

Public Schools Statewide Summary

Of the 1,011 public schools that were asked to complete the 2021-2022 Kindergarten Assessment 986 (97%) submitted results. Survey participation remains high, yet these figures represent a 2.5% decline in the number of public-school kindergarten programs represented in this report when compared to the 2020-2021 Kindergarten Immunization Compliance Assessment. Statewide, 93.9% of public-school students were fully immunized at the time of the survey (70,274 of 74,830 students). Students who were not fully immunized fell into the following categories, in decreasing order of prevalence (Note: arrows and corresponding figures represent the percent change between 2020-2021 and 2021-2022 assessments):

- Religious Exemption: 2.2% (n=1,653) ↑ 0.5%
- Temporary Certificate: 2.0% (n=1,501) ↑ 1.0%
- Incomplete Record: 1.2% (n=907)
- Missing Record: 0.5% (n=349)
- Medical Exemption: 0.1% (n=82)
- Transfer <30 days: 0.1% (n=85)

Private Schools Statewide Summary

Although our response rate remains relatively stable among private schools, we continue to see a shift towards private schools with an all-time high of 5.4% of all kindergarten enrollment reported in the 2021-2022 Kindergarten Immunization Compliance Assessment. A total of 175 private schools (out of 272 schools; 64%) with kindergarten enrollment completed the 2021-2022 Kindergarten Assessment. Statewide, the survey response rate for private schools increased by 3% resulting in an 11.5% increase in the number of private school kindergarten students represented in this report. Of those students, only 89.4% (3,834 of 4,290 students) were fully immunized, which represents a 2.9% decrease in the fully immunized rate when compared to last year. Unlike the public-school Kindergarten Assessment, the private school survey does not ascertain how many private school students had immunization certificates that were validated by TennHIS. Students who were not fully immunized fell into the following categories, in decreasing order of prevalence (Note: arrows and corresponding figures represent the percent change between 2020-2021 and 2021-2022 assessments):

- Religious Exemption: 4.2% (n=181) ↑ 0.2%
- Incomplete Record: 3.2% (n=139) ↑ 0.9%
- Missing Record: 2.5% (n=107) ↑ 1.5%
- Temporary Certificate: 0.4% (n=18) ↓ 0.3%
- Medical Exemption: 0.3% (n=11) ↑ 0.2%
- Transfer <30 days: N/A for private schools based on data collection methods

Trends over Time

The 10% decline in overall enrollment observed in the 2020-2021 Kindergarten survey was almost completely reversed in the 2021-2022 survey which saw enrollment grow by 7.2% to 79,120 kindergarten students. As mentioned, approximately 5.4% of the kindergarten assessment enrollment in this report are from private schools compared to 3.5% in 2018-2019. Since 2015, the percentage of public and private school students who received all vaccines per Tennessee's state requirements for kindergarten entry (i.e., were "fully immunized") has consistently been close to 95%. In recent years that stability ended with an all-time low of 93.7% of all 2021-2022 reported kindergarten students in Tennessee being fully immunized. For a community to remain at low-risk for a highly infectious vaccine-preventable disease outbreak such as measles, this rate must remain above 95%.⁷ With fewer kindergarteners in the fully immunized category statewide, many counties fail to meet the minimum threshold for vaccine-preventable disease immunity. In fact, the number of counties that meet the minimum 95% fully immunized threshold has decreased from 72 to 43 counties in just two years representing a decrease of 40.3%.

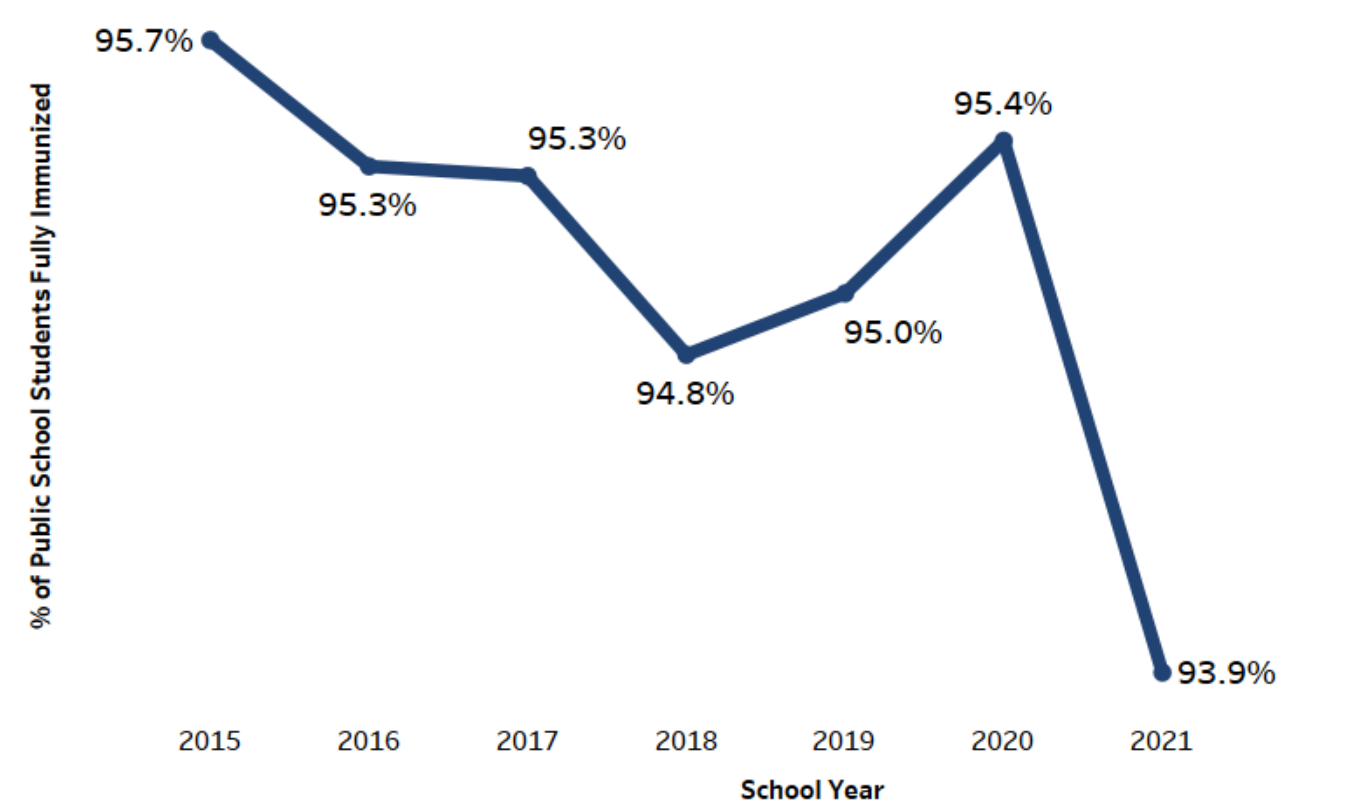

Despite a relatively stable number of exemptions over the past five years, this year (2021-2022), we recorded a 1.4% increase in overall exemptions, statewide. Dating back to 2016 we recorded declines in incomplete records and increases in temporary certificates (see Figure 3). In 2020-2021, this four-year trend reversed with temporary certificates decreasing by 0.9% and incomplete records increasing by 0.5%. This year (2021-2022) temporary certificates rebounded back to the 2019 level of 1.9%, but incomplete records maintained the previous year's increase of 1.3%. Together, the shifts in incomplete records and temporary certificates equate to a higher number of children missing required immunizations for kindergarten enrollment. Furthermore, in 2021-2022 we recorded a 0.5% increase in religious exemptions to an all-time high of 2.3% of all kindergarten students, statewide. The increasing number of kindergarteners who are not fully immunized indicates Tennessee schools and communities are more susceptible to vaccine-preventable disease outbreaks.

⁸ <https://globalhealthnow.org/2019-12/myth-about-herd-immunity>

Impact of COVID Pandemic

National estimates have shown a decline in overall vaccination rates following the United States declaration of a national state of emergency due to the SARS-CoV-2 pandemic. Although sporadic increases in vaccination administration have been observed in the last year, the improvements were neither large nor long-lasting enough to overcome the decline documented during the height of the pandemic. The Kindergarten Immunization Compliance Assessment Report affords a unique opportunity to document the impact of the pandemic upon childhood immunization rates in Tennessee. As pandemic restrictions have been lifted overall kindergarten enrollment increased in 2021-2022 but still fell short of pre-pandemic 2019-2020 figures. Since the pandemic started, the number of counties with public schools that fall below the 95% fully immunized threshold increased 31%. As a result, only 45% (43 of 95) of in the 2021-2022 Kindergarten assessment meet the minimum threshold of 95% fully immunized for vaccine-preventable disease immunity. Of the 31 counties with private school responses to the 2021-2022 survey, only 26% exceed 95% of students fully immunized. While overall immunization coverage has declined, the survey results show religious exemptions in public schools have risen by 0.4% while private school religious exemptions have increased by 1.5% since the 2019-2020 school year. Since the onset of the pandemic, we have observed a sharp decline in fully immunized kindergarten students in Tennessee which represents an increased risk of vaccine-preventable disease outbreaks. Immediate action to increase compliance with recommended childhood immunizations is necessary to decrease the risk of future vaccine-preventable disease outbreaks in our schools and communities alike.

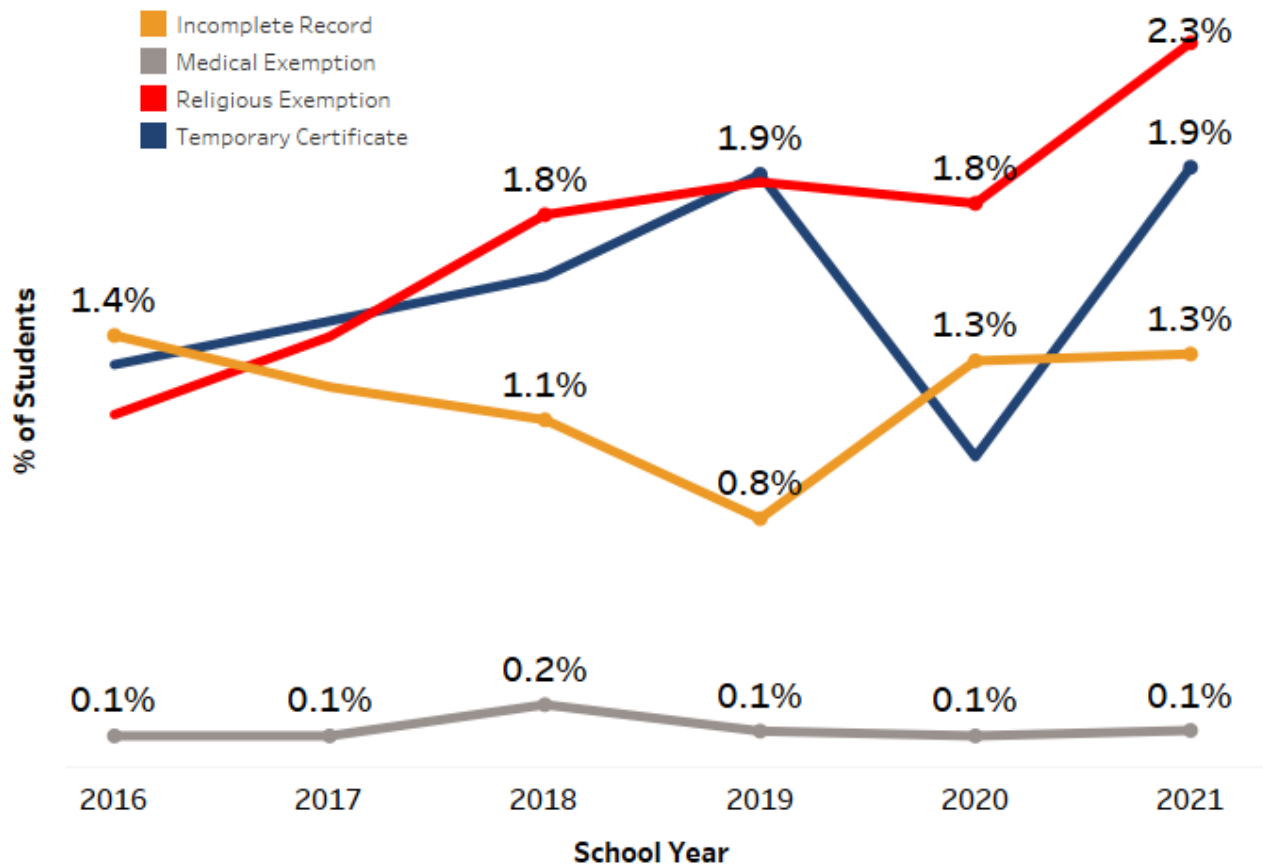

Figure 2. Percentage of public-school students fully immunized, 2015-2021

The percentage of all TN kindergarten students who were not fully immunized, by category, over time, are shown in **Figure 3**. Incomplete immunization records decreased for four years until 2020-2021 when they increased by 0.5% to 1.3% where it remained for the 2021-2022 survey (see Figure 3, gold line). The SARS-CoV-2

pandemic resulted in barriers to obtaining immunizations as well as administrative challenges in the schools responsible for enforcing the state's immunization requirements. Although many of these disruptions have subsided, the subsequent increase in incomplete records remains. Similarly, the trend in temporary certificates (see Figure 3, blue line) suddenly reversed course in 2020-2021, but has returned sharply to pre-pandemic status. Although the driving force behind last year's sudden shift in temporary certificates to incomplete records is unknown, it appears that these indicators (temporary certificates and incomplete records) of unvaccinated kindergartners remain clear contributors to the low fully immunized status of student populations. The percentage of students claiming a religious exemption also increased drastically from 1.8% to 2.3% in 2021-2022 (see Figure 3, red line). The percentage of kindergarten students claiming medical exemptions from a vaccine remained stable at approximately 0.1% each year, consistent with the national rate of medical exemptions (see Figure 3, grey line). The percentage of students with missing vaccine records has also remained relatively stable at approximately 0.6% (not shown in figure). The large increases in temporary certificates and religious exemptions represents the largest contributors to a record high 6.1% of unvaccinated kindergarten students and high vulnerability for vaccine preventable disease outbreaks.

Figure 3. Percentage of all TN kindergarten students not fully immunized, by category, 2016-2021

For Tennessee to remain free of vaccine-preventable disease outbreaks, action is needed to provide missed immunizations to children and ensure that public schools are following state immunization requirements. Medical providers who deliver health care to children are encouraged to review immunization records and provide catch-up immunizations at every opportunity. Thank you for partnering to protect public health in Tennessee.

2021-2022 Kindergarten Immunization Compliance Assessment Results

Public Health Regions Summary

The percentage of public-school students fully immunized across Tennessee's public health regions ranged from 89.2% to 96.1%, with Chattanooga/Hamilton Region having the lowest percentage of fully immunized students and North East Region having the highest percentage of fully immunized students during the 2021-2022 school year (see Figure 4). **Figure 5** displays the percentage of public-school students who had a temporary certificate, a religious exemption, an incomplete record, or had a medical exemption, across Tennessee's public health regions.

Figure 4. Percentage of public-school students fully immunized, the number of public-school students fully immunized, and the number of students not fully immunized, by public health region during the 2021-2022 school year

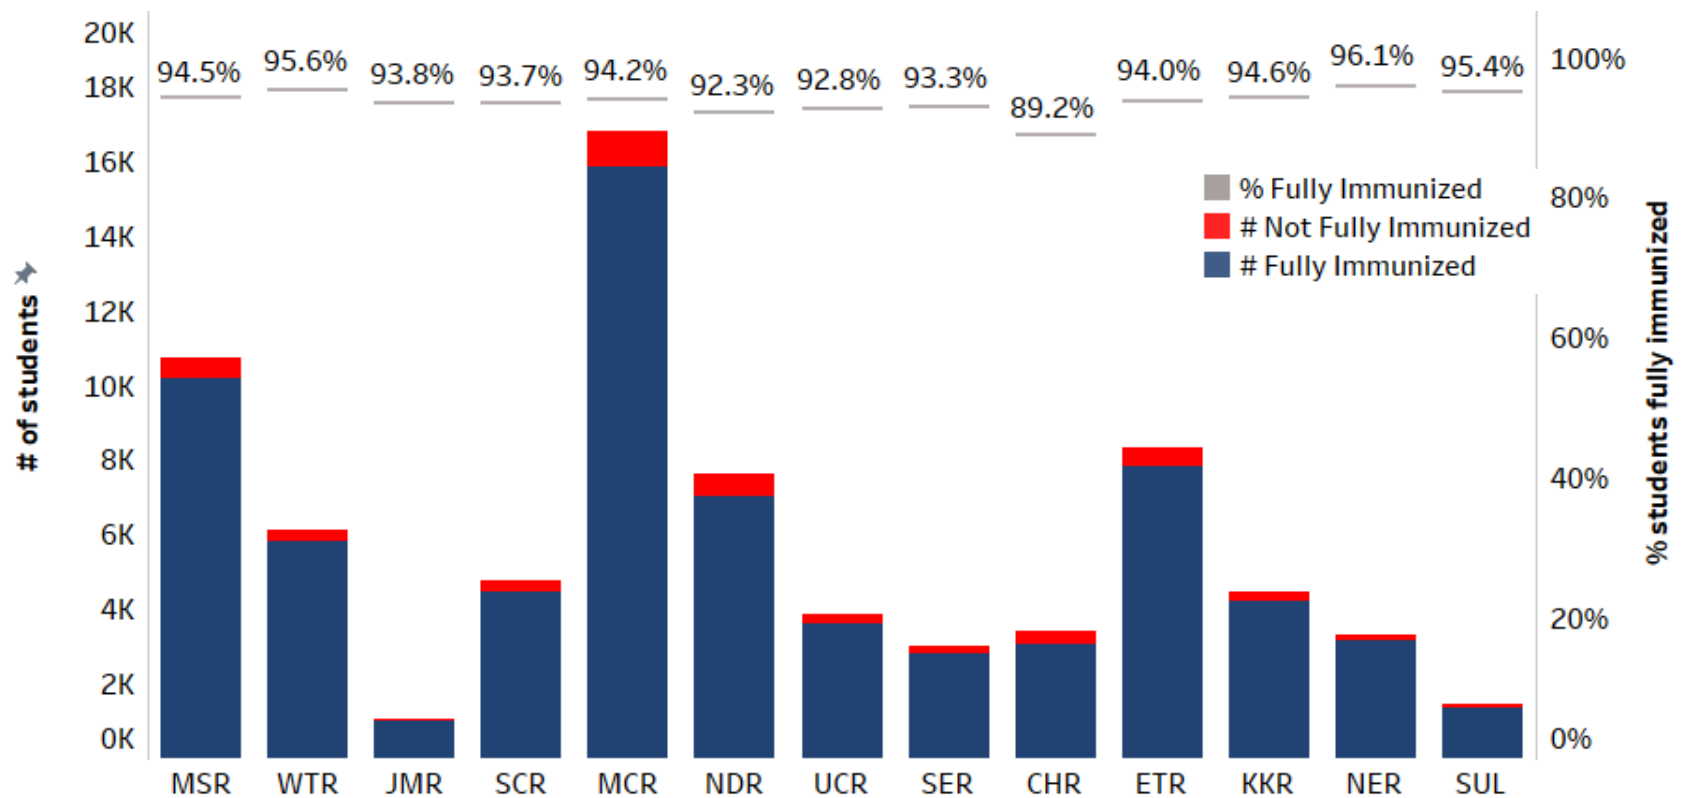

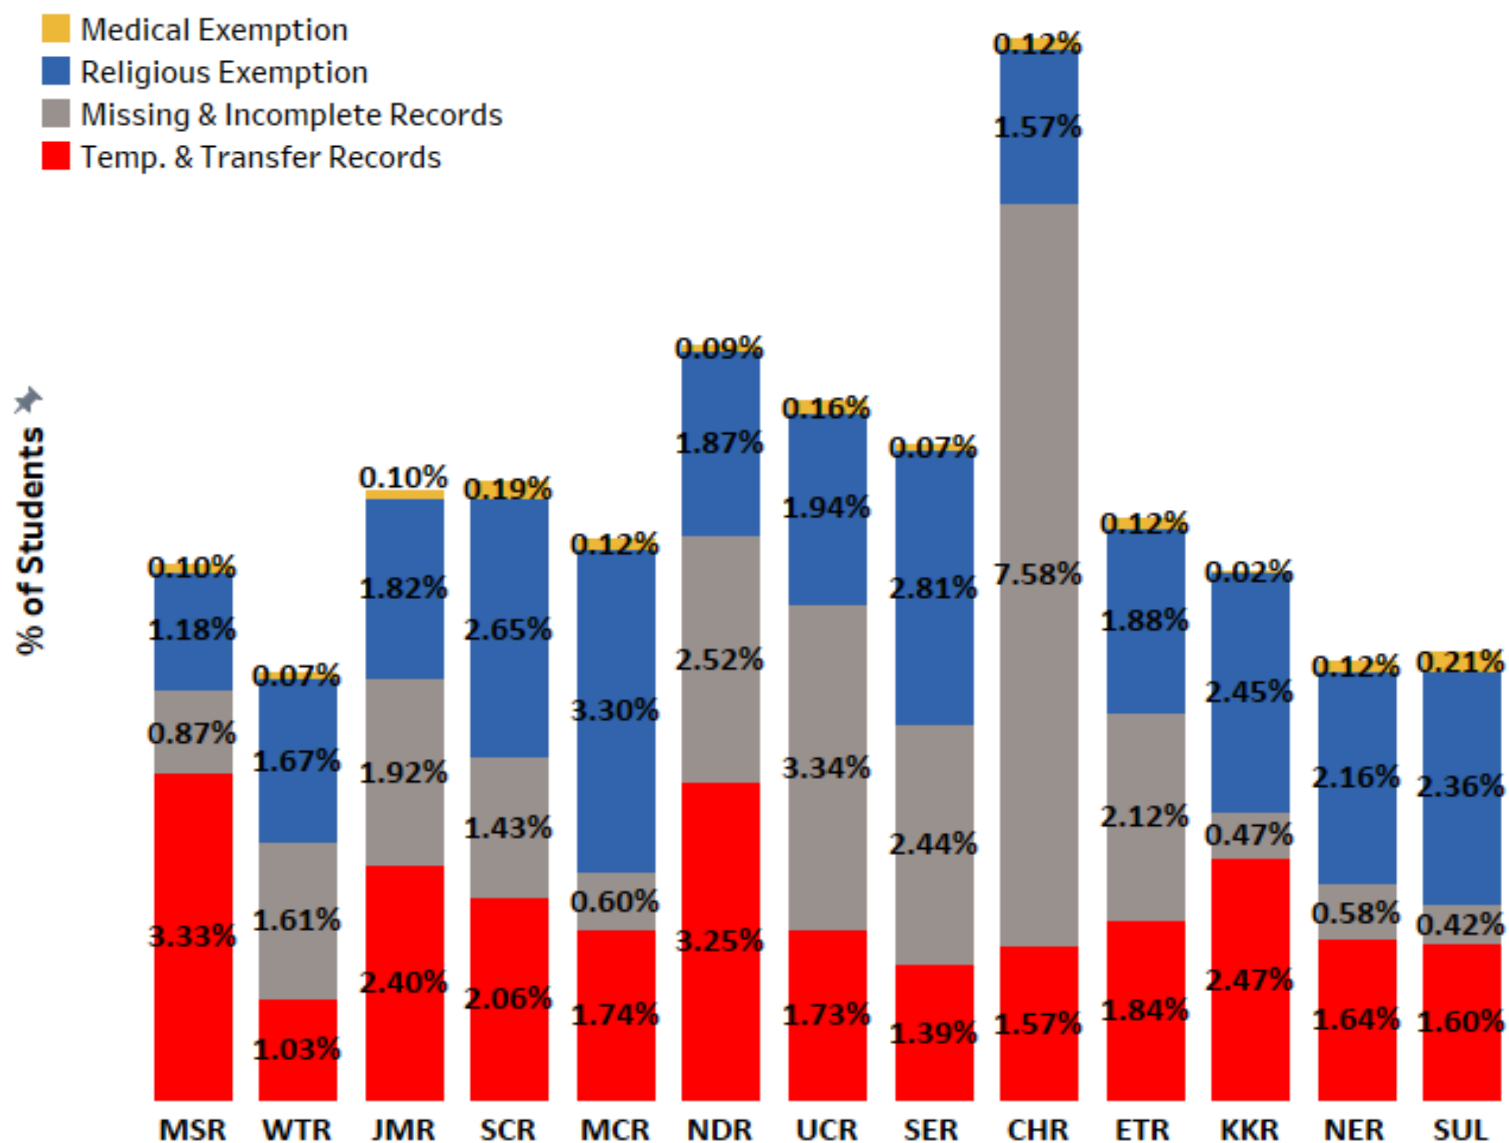

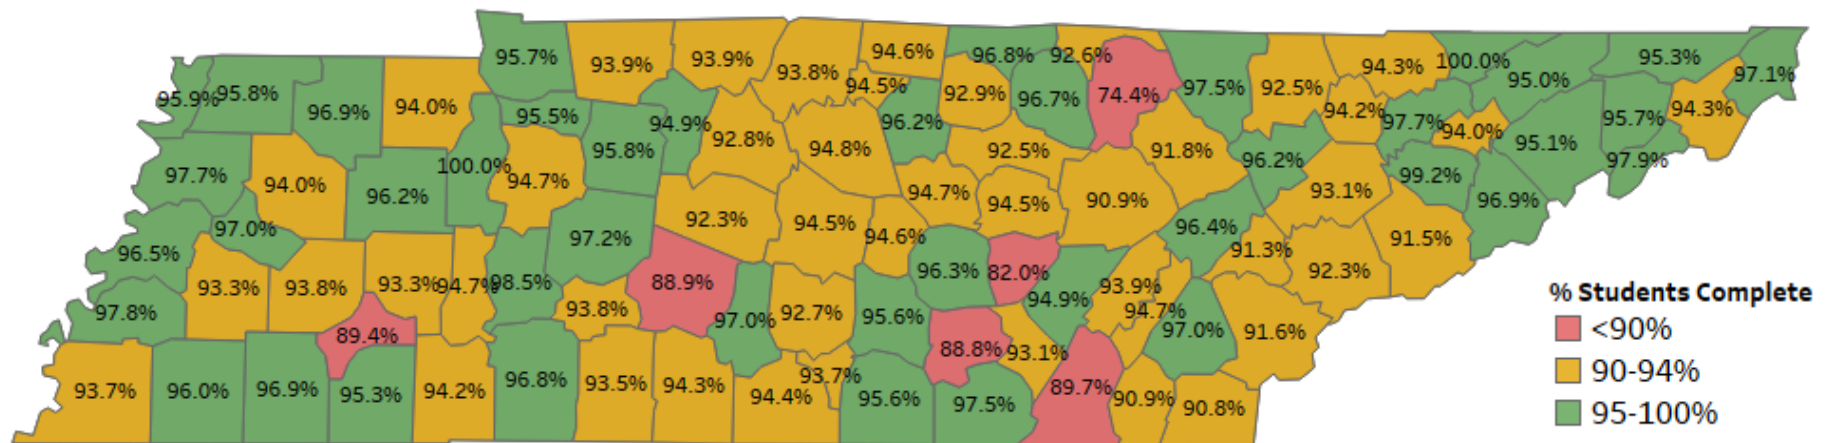

Figure 5. Percentage of **public-school** students with a temporary/transfer immunization record, religious exemption, incomplete/missing record, or medical exemption, by public health region during the 2021-2022 school year.

County Level Summary

The percentage of public-school students who were fully immunized, by county, ranged from 74.4% (Fentress County) to 100% (Benton & Hancock Counties) (see Figure 6). Among private schools, the range was from 25.0% (Campbell County) to 100% (Lawrence, Loudon, Rutherford, Washington Counties) (see Figure 7). Note that the number of public and private schools within each county varies, and not all counties have private school survey responses. For a detailed breakdown of the number of public and private schools within each “percentage fully immunized” category, and the total number of students in each county, see Table 1 in this report.

High immunization coverage rates are critical to avoiding vaccine-preventable disease (VPD) outbreaks (e.g., measles, pertussis). A VPD outbreak may occur when community members are inadequately immunized against a disease. To remain at low risk for a VPD outbreak the immunization rate should remain at or above 95%. In the maps above and tables below, an immunization rate of at least 95% meets this immunization goal, an immunization rate of 90% to 94.9% needs improvement, and an immunization rate below 90% places the community at increased risk for vaccine-preventable disease outbreaks.

For detailed Kindergarten Assessment results at the county, school districts, and school levels, please see the *Public-School Districts (SD) by County Summary* section below.

Public and Private School Summaries by County and School District

The following series of tables and graphs capture information at two different levels: 1) at the county-level, featuring information for both public and private schools within the county; and 2) at the school district level, featuring information for all schools within the school district. Data are presented by county in alphabetical order, with school districts nested under each respective county in alphabetical order, and schools nested under each respective school district in alphabetical order.

Below are descriptions of each vaccine type shown in the county tables and graphs.

- Diphtheria-Tetanus-Pertussis vaccine (DTaP)⁸
- Hepatitis A Virus vaccine (HAV)⁹
- Poliomyelitis vaccine (IPV or OPV)
- Measles, Mumps, Rubella vaccine (MMR)
- Hepatitis B Virus vaccine (HBV)
- Varicella (chickenpox) vaccine (or credible history of disease)

Below are descriptions of each category shown in the county tables and graphs. All table percentages on a given row are the percentage of the “Total Students” number on that row.

County	Tennessee county name. School districts are grouped into their corresponding county.
School District	Department of Education school district name. Schools are grouped into their corresponding school district. Private schools are listed under a “private” district name within each county where applicable.
School Name	School name, listed alphabetically within each school district.
Total Students	Total number of enrolled kindergarten students at the time of immunization record assessment.
Fully Immunized	Number and percentage who meet state school entry requirements by being fully immunized.
Religious Exemption	Number and percentage with a valid religious exemption.
Medical Exemption	Number and percentage with a valid medical exemption to one or more vaccines.
Temporary Certificate	Number and percentage with a valid temporary certificate.
Excluded Transfer	Students exempt from assessment because records are unavailable due to a recent transfer from another TN school (within 30 days of the assessment). N/A for private schools based on data collection methods.
Incomplete Record	Number and percentage who do not meet requirements because they have an incomplete vaccination record.
Missing Record	Number and percentage who do not meet requirements because the school has no official immunization certificate on record.

⁸ Diphtheria-Tetanus toxoid vaccine (DT), if medically indicated
