Accountability Data – Tennessee uses accountability data to track growth and improvement year-over-year. Accountability data include gains on student assessments, gap closure between groups of students and graduation rate. These measures meet certain federal requirements and are used to determine a school or district’s accountability status under the state’s waiver from the Elementary and Secondary Education Act. The overall percentage of students scoring proficient and advanced on accountability data may differ from achievement data because of the federal accountability requirements related to students with disabilities and English Learners.

Achievement Data – Achievement data are a measure of overall student performance. They include the percentage of students scoring proficient or advanced on the Tennessee Comprehensive Assessment Program, or TCAP, Achievement tests in grades 3-8 and high school End of Course exams. Another achievement measure reported by the state is the ACT test. The overall percentage of students scoring proficient and advanced on achievement data may differ from accountability data because of the federal accountability requirements related to students with disabilities and English Learners.

Note: The 2009 baseline provides a fixed transition point prior to the 2009-10 school year implementations of the new curriculum standards and assessments more reflective of national and international student performance in the 21st Century. The 2009 achievement scores and all grades connected with these scores are considered the new baseline for future public reporting. These converted achievement scores and grades are based on restructured calculations and a redefined grade scale that are updated to reflect the current status of educational attainment in the state. The 2009 change has prohibited comparisons to previous years' data for achievement reporting including state, district, and school-level scores and grades. For 2009 only, the most appropriate and meaningful comparison would be to State level data.
