NOTICE

Office of the District Attorney
11th Judicial District
October 11, 2013

It has come to our attention that on April 22, 2013 an error occurred at the Tennessee Bureau of Investigation Lab, Nashville, in regard to a blood alcohol examination that was evidence in criminal case number 288746. The testing was conducted by examiner Kyle Bayer who attributed the results of this test to the wrong case file. We have been informed by the lab that the mix-up occurred as a result of this particular examiner's failure to follow established lab procedures and not as the result of the lack appropriate procedural safeguards. Though the lab believes this to be an isolated incident they have sent all tests performed by this examiner to a private lab for retesting and they have terminated the examiner for the procedural violation.

If you have cases involving results from this examiner the case may be briefly delayed in order to accomplish retesting.

Thank you,

Bill Cox
District Attorney
