

I hope this wakes the DA's up.....nothing that I have been accused of is true but that does not keep the supermajority at bay....this is all because a detective was fired who happens to be related to Mike Bell's wife. He illegally accessed the drug portal as well as the criminal justice portal in violation of the law as well as in violation of department policy. I told all of you the AG was not truthful when he announced he had received a "scathing financial report" on me. There was a TBI investigation on the DTF requested by me including a forensic audit....based on accusations made by now former detective Duff Brumley and Judge Amy Reedy....a pro-tem DA presented that to a Grand Jury and they returned a no-bill on then director Mike Hall. The case on Brumley was handled by another pro-tem who refused to prosecute. WE believe the evidence was strong that REEDY and Brumley were conspiring to get the director because Brumley wanted that job. After I was elected we made a big push to solve and prosecute a triple homicide in Cleveland from 1999 as well as the Leath case from Knoxville. Brumley was our prosecuting witness in the triple and Maurice Johnson was convicted and given life. Before the others were tried we Brumley offenses were discovered as well as 220 phone calls between Judge Reedy and Brumley while these matters were pending. I reported this to the AG and they promised a an investigation the truth is someone stopped it in its tracks. The same complaint was made to the Court of the Judiciary and they dismissed the complaint. After the Johnson trial we had asked her to recuse herself because the victim's family felt she was being favorable to the defense. She never revealed any relationship with Brumley. There is no question that Brumley became friends with Times-Free Press reporters during the trial and sudden Judy Walton started her six part attack on me based on allegations with no attribution of sources which was mainly Brumley who she never

Quoted. Bell and Eric Watson then requested this investigation of the AG and he bowed down, then the Board of Professional Responsibility is being pressured by legislators to find something unethical. The AG talks about how bad it would be to elect an AG but if the AG gives in to this kind of pressure....wow! Incidentally if I could start an investigation on the probable cause the AG required Eric Watson would have been indicted twice but I refused to act on rumors or allegations without a reliable source. I know today those allegations were true but I couldn't get anyone to stand up...You may not really know me but I can tell each of you I may not be the smartest of you but I have not violated the Code. I will volunteer for a polygraph but I doubt my accusers will. For your information I run on the Democrat ticket but 10 of my 13 lawyers and all but one of the support staff tell me they are Republicans. I have never ask any of them their politics....Wake up folks....if they can't control you you may be ousted. Sadly in the past few months Mike Bell has interfered with two law enforcement matters but who can I complain to and Eric Watson is able to get TBI to do an investigation on an officer after hours without a request from me....I can get TBI out after hours on a murder or some other violent crime but Watson calls and here they come. Panic the next morning wanting me to do a request .UI did so but included how it happened. Unless I am ousted my service to this state will end on 8/31/2014. All of you need to open your eyes to the evil of any supermajority of any party.
