They had patched the roof over and over again on the West Wing side of the building, but the leaking had gotten out of control. Further interview, he stated that when it rained hard, it would leak in room 205 and come out as far as to the hallway. Observation on 11/05/15 at 1:50 p.m. of an outside covered patio with the Maintenance Director revealed the following concerns: An irregular triangular-shaped section in the front corner on the West wing side of the patio where the soffit was missing. An approximate five-foot section where the soffit material was either missing or hanging down just past the automatic door from the lobby leading to An approximate four-foot section where the soffit material was missing between two West wing resident room windows against the patio wall. Interview with the Maintenance Director at the time of observation revealed the damaged soffit was from water damage.
